Assets for Nuclear Weapons are Fake

Web page intro (made with chat gpt)

Welcome to Nuclear Weapons Are Fake

Are nuclear weapons real? Or are they an elaborate myth born out of fear, politics, and power? At *Nuclear Weapons Are Fake*, we explore these questions and more, diving deep into the stories, science, and history that have shaped one of the most controversial topics of our time.

This is a space for thinkers, skeptics, and truth-seekers—a platform where mainstream narratives are re-examined, and unconventional perspectives are brought to light. Whether you're here out of curiosity, doubt, or a desire to challenge what you've been told, you've come to the right place.

What You'll Discover

- **The History:** How did the idea of nuclear weapons become a cornerstone of global politics?
- **The Science:** Examining the technical claims—are they all they seem?
- **The Narrative:** Who benefits from the belief in nuclear weapons, and why?

Join us in peeling back the layers of a global story that's been accepted without question for far too long. Together, we'll uncover the truths—or myths—that lie beneath.

Start your journey today.

Because the truth deserves a closer look.

About us

About Us

Welcome to *Nuclear Weapons Are Fake*, a platform dedicated to exploring unconventional perspectives on one of the most significant topics of modern history.

Our mission is to challenge mainstream narratives surrounding nuclear weapons, providing thought-provoking content, research, and discussions. We aim to spark critical thinking, question widely accepted beliefs, and create an open space for examining alternative viewpoints.

What We Believe

At *Nuclear Weapons Are Fake*, we believe in the power of inquiry and skepticism. Through detailed analysis and examination of historical events, scientific claims, and geopolitical motivations, we encourage our readers to look beyond the surface and ask deeper questions.

What You'll Find Here

- **In-Depth Articles:** Research-driven content that critically examines the history, science, and politics of nuclear weapons.
- **Community Engagement:** A space for open dialogue where readers can share their thoughts and engage with others.
- **Alternative Insights:** Perspectives that challenge the status quo and offer new ways of understanding global narratives.

Join the Conversation

We invite you to embark on this journey of discovery with us. Whether you're a skeptic, a researcher, or just curious, *Nuclear Weapons Are Fake* is a space for open minds and respectful dialogue.

Let's question the world together.

Disclaimer: Our website is designed to foster critical thinking and discussion. We encourage readers to explore diverse viewpoints and verify claims independently.

Memorial / About the founders

Mark Andreessen: A self-taught researcher and writer, Anderneese has spent over a decade studying geopolitics, historical conflicts, and alternative theories related to global security. His focus is on the intersection of political power, military technology, and public perception. Through a combination of skepticism and academic rigor, Anderneese has cultivated a reputation for questioning the mainstream narratives about war, weapons, and international diplomacy.

Owen Benjamin: a transition from comedian to conspiracy theorist began in earnest around the mid-2010s when his public persona started to shift. Initially known for his stand-up comedy and appearances on mainstream platforms like YouTube and Comedy Central, Benjamin began to use his platform to question the veracity of commonly accepted historical events. His rhetoric increasingly aligned with alternative media outlets and anti-establishment viewpoints, leading him to publicly reject the narratives around events like 9/11, the moon landing, and, most notably, nuclear weapons.

Research from apnews

(<https://apnews.com/article/fact-check-nukes-fake-camera-conspiracy-rogan-742805510402>)

“A popular Instagram post included a clip of a July 19 episode of “The Joe Rogan Experience” featuring billionaire investor Marc Andreessen, who outlined a “conspiracy theory” that the U.S. faked nuclear weapons testing.

While [footage of this testing](#) appears on screen, showing houses and other structures being destroyed, Andreessen says: “So what happened to the camera? How is that happening yet the camera’s totally stable and fine? And by the way, and the film is fine. The radiation didn’t cause any damage to the film.”

The Instagram post takes this erroneous theory seriously, stating that “nukes are FAKE!” and simply “another scare tactic they use against the masses!” It had received more than 3,700 likes as of Friday.”
